

Regarding Medical Care for International Patients

For international patients who are not covered by a public health insurance plan in Japan

Starting on May 1, 2018, in our hospital, international patients who are not Japanese nationals and not covered by a valid public health insurance plan in Japan will be required to pay 20 yen for each point of the medical service fees (a separate payment for consumption tax will also be added). In addition, there are extra charges for the use of a special private room during the hospital stay, for the creation of documents, and so on.
